EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Richard Peet on May 20, 2004.

The application has been amended as follows:

In the Claims:

Claims 1-20 have been canceled.

In claim 27, "said allergen gene" was replaced with "said *Ara h* gene" in line 4.

In the Specification:

On page 4, line 20: www.ncbi.nlm.nih.gov/htbin...ery?uid=1236995 has been deleted.

On page 51, lines 13 and 14: www.stanford.edu/Saccharomyces/yeast96/f2021.html has been deleted.

The following is an examiner's statement of reasons for allowance: The closest prior art are the references of Tada et al., Kleber-Janke et al., and Lacorte et al., cited in the Office action mailed February 20, 2004, which disclose a method for antisense suppression of a 16 kDa allergen in rice seeds, the identification of homologous regions common to more than one *Ara h*

allergen gene, and gene transfer into peanut plants via *Agrobacterium tumefaciens*, respectively, but do not teach or suggest a method for producing a transgenic peanut plant with reduced or undetectable allergen protein content in the seed comprising identifying a homologous region common to more than one *Ara h* allergen gene; cloning the homologous region in a vector modified for peanut transformation; transforming a recipient peanut plant cell with the vector; and identifying a transgenic plant that produces seeds having reduced or undetectable allergen protein content.

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.
